Passive electrical components

Type series: REB: audio frequency capacitors, radial design

with slightly roughened aluminum foil, 15 VAC / 40 V- or 23 VAC / 63 V-

(according to type series TRB)

technical description

Electrolytic capacitors for standing installation in printed circuits for hi-fi applications.

Operational reliability: 500 h / 105 ° C, 2000 h / 85 ° C, 40,000 h / 40 ° C

Operating voltage: 15 VAC / 40 V-, 23 VAC / 63 V-

Capacity: 1.0 to 22 μ F

Operating temperature range: GMF (-40 ° C to 105 ° C)

Housing: aluminum cup insulated with PVC shrink tubing, directly printed.

Connection wires : tinned steel wire

Special values and special dimensions on request

Made in Germany
