

Base connection diagram:

1. Current limit
2. Inverting input
3. Non inverting input
4. Reference voltage
5. Ground (-)
6. Output stabilized voltage U_2
7. Supplying of output transistor $+U_O$
8. Non stabilized input voltage $+U_1$
9. Frequency compensation
10. Current limit

Bottom view

Sockelschaltung:

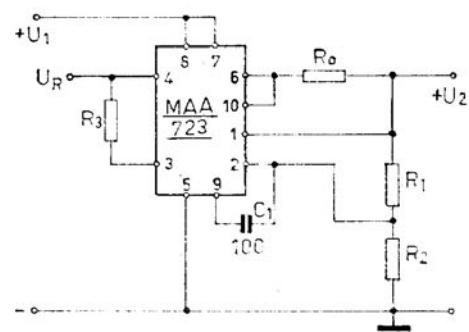

- Strombegrenzung
- Invertierender Eingang
- Nicht invertierender Eingang
- Referenzspannung
- Erde (-)
- Stabilisierte Ausgangsspannung U_2
- Speisung des Ausgangstransistors $+U_O$
- Nicht stabilisierte Eingangsspannung $+U_1$
- Frequenzkompensation
- Strombegrenzung

Maximum ratings:

Grenzwerte:

$U_{1\ imp}$ ($t = 50$ ms)	max	50	V
U_1	max	40	V
$U_1 - U_2$	max	40	V
I_2	max	150	mA
I_R	max	15	mA
P_{tot}	MAA723	max	800 mW
MAA723H	max	700 mW	
ϑ_a	max	-55 ... +125	°C
ϑ_{stg}	max	-65 ... +155	°C

Recommended circuit • Schaltbeispiel

Output voltage $U_2 = 7 \dots 37$ V
 Ausgangsspannung

U_2	R_1	R_2
9 V	1,87	7,15 kΩ
15 V	7,87	7,15 kΩ
28 V	21	7,15 kΩ

Outlines • Abmessungen IO 7

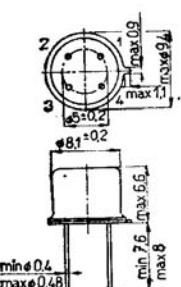

Characteristic data: Kenndaten:

**Measured at:
 Gemessen bei:**

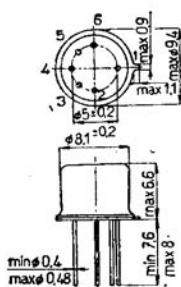

Line regulation at input voltage change	Empfindlichkeit gegen Eingangsspannungsänderungen MAA723 MAA723H	ΔU_2	0,02	<0,1 %	U_2	$U_1 = 12 \dots 15$ V, $U_2 = 5$ V, $I_2 = 1$ mA
Line regulation at input voltage change	Empfindlichkeit gegen Eingangsspannungsänderungen MAA723 MAA723H	ΔU_2	0,1	<0,2 %	U_2	$U_1 = 12 \dots 40$ V, $U_2 = 5$ V, $I_2 = 1$ mA
Line regulation at input voltage change in ambient temperature range	Empfindlichkeit gegen Eingangsspannungsänderung im Umgebungstemperaturbereich MAA723	ΔU_2	0,4	<1 %	U_2	$U_1 = 12 \dots 15$ V, $U_2 = 5$ V, $I_2 = 1$ mA
Load regulation at load change	Empfindlichkeit gegen Laststromänderungen MAA723 MAA723H	ΔU_2		<0,3 %	U_2	$U_1 = 12 \dots 15$ V, $U_2 = 5$ V, $I_2 = 1 \dots 125$ °C
Load regulation at load change in ambient temperature range	Empfindlichkeit gegen Laststromänderungen im Umgebungstemperaturbereich MAA723	ΔU_2		<0,15 %	U_2	$U_1 = 12$ V, $U_2 = 5$ V, $I_2 = 1 \dots 50$ mA
Average temperature coefficient of output voltage	Mittlerer Temperaturkoeffizient der Ausgangsspannung MAA723 MAA723H	T_{KU2}	0,005	<0,015 %/°C	U_2	$U_1 = 12$ V, $U_2 = 5$ V, $I_2 = 1 \dots 50$ mA, -55 °C $\leq \vartheta_a \leq +125$ °C
Reference voltage	Referenzspannung MAA723 MAA723H	U_R	7,15	6,95 ... 7,35	U_2	$U_1 = 12$ V, $U_2 = 5$ V
Standby current drain	Stromaufnahme ¹⁾ MAA723 MAA723H	I_O	2,3	<3,5 mA	U_2	$U_1 = 30$ V, $I_2 = 0$
Input voltage range	Eingangsspannung	U_1		9,5 ... 40 V		
Output voltage range	Ausgangsspannung	U_2		9 ... 37 V		
Input-output voltage differential	Eingang-Ausgangs-Spannungs differenz	$U_1 - U_2$		3 ... 38 V		

¹⁾ Output and reference voltage source without load. • Ausgangs- und Referenz-Spannungsquelle ohne Last. • $I_R = 0$.
