

#### Features

- DIL Pitch Terminals .High Sensitivity :0.14W or 0.10W Nominal Power。
   Conforms to FCC Part 68 1.5kV Surge and Dielectric 1000VAC。
- Monostable or bistable relays Single and double Coil magnet latching Type available.
- Application for Telecommunication Equipment,Office Equipment,Security Alarm Systems, Measuring instruments, Medical Monitoring Equipment,Audio Visual Equipment, Flight Simulator,Sensor Control.

**CAUTION:** 1. The use of any coil voltage less than the rated coil voltage will compromise the operation of the relay. 2. Pickup and release (reset) voltage are fortest purposes only and are not to be used as design criteria.

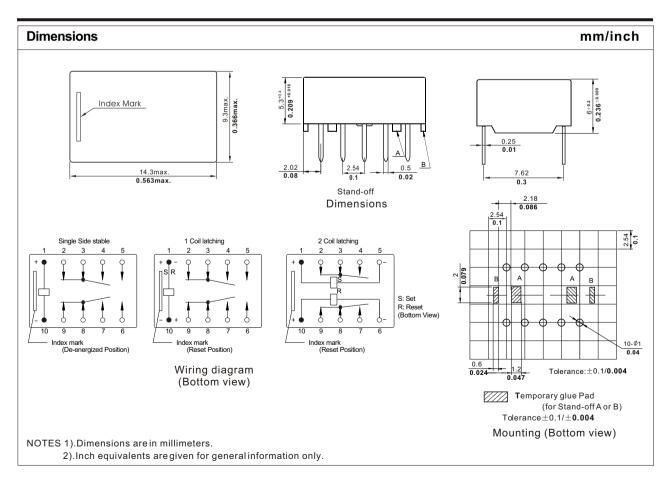

- 3.When latching relays are installed in equipment, the latch and reset coil should not be powered simultaneously. Coil should not be pulsed with less than the nominal coil voltage and pulse width should be a minimum of three times the specified operate time of the relay. If these conditions are not followed, it is possible for the relay to be in the magnetically neutral position.
