

Product Data Sheet

Gel Flux

Flux gel is the condensed rosin type flux of RMA class, 1.1.2/3 A type according to ISO 9454-1, intended for SMT assembly and repairs. Flux gel can be applied through a sieve, pattern or from a syringe. Activators utilized in flux manufacturing process enable to leave its remnants after soldering on the package (as far as the process does not include washing phases).

Application:

- ◆ SMT assembly
- ◆ SMT repair

Package:

Capacity	Package	Symbol
1,4 ml (syringe)	5	ART.AGT-047
14 cm ³ (syringe)	2 or 16	ART.AGT-088
100 cm ³ (plastic can)	1 or 4	ART.AGT-089
